THE HOSTETTER COMPANY,
PITTSBURGH, PA.

FOIL THE TRICKS OF IMPOSTURE.

THOUGH the Proprietors of *Hostetter's Stomach Bitters* interpose every obstacle to the practice of imposture upon the unsuspecting by unscrupulous counterfeiters of the best Tonic of the age, which a due regard for the welfare of the sick and debilitated, as well as self interest can suggest, yet it is impossible to wholly nullify the schemes of Fraud, if the public neglect to guard themselves against it. In order that they may detect and thwart imposition, attention is again drawn to

THE MARKS OF AUTHENTICITY UPON THE GENUINE

HOSTETTER'S STOMACH BITTERS.

Blown in the bottle is the name of the preparation (Dr. J. Hostetter's Stomach Bitters). On one side of the bottle is a fine steel plate label, on which St. George and the Dragon figure as a vignette, and at its foot is a miniature note of hand, with engraved *fac-simile* of the signature of the President of our Company. The directions for use, in bronze letters on a dark ground, are on the opposite side. A metallic cap, stamped with a medallion head and the name of the article, envelopes the cork. The Bitters is put up **ONLY IN GLASS**, and sold by the bottle or case. The monogram of the Company, thus  is burnt on the top of the cork of each bottle, which is a protection against tampering with or refilling the bottle.

Various tricks are resorted to by the knaves who endeavor to palm off their astringent and fiery concoctions upon the unobservant and credulous as Hostetter's Stomach Bitters. The real name of the article is sometimes counterfeited, or so closely approximated as to deceive the unwary eye. Imitations of the label which are not exactly counterfeits, are also among the examples of a phase of rascality which, considering the incalculable injury it inflicts upon the sick, ought to be visited with the heaviest penalties of the law. Fortunately, however, all these attempts at imposition require but a cursory examination to detect them, since they invariably lack some important external characteristic of the genuine preparation, or else are so badly executed as to be manifestly bogus.

It is simple charity to add another caution, which those in search of medicinal aid will do well to heed, since it is directed against a class of nostrums not less hurtful, viz., the cheap local bitters sold as tonics. To swallow any of these dangerous excitants is nothing less than a sheer disregard of health, since they are for the most part composed of unrectified spirits, with a large admixture of high wines, surcharged with fusel oil, a poison, and flavored with some bitter drug. Though they are sold at a low rate, he who drinks them pays dearly in another sense. Let all therefore, who have any regard for the "inner man," refrain from punishing him with drams so destructive as to threaten his very life.

Hostetter's California Almanac

For the Year

1897

Calculated for

CALIFORNIA AND OREGON.

A PEERLESS TONIC STIMULANT.

TONIC Stimulation is regarded by all intelligent physicians as one of the best resources of medicine. In nervous diseases, accompanied by debility, dyspepsia, inactivity of the kidneys or bowels, hysteria, hypochondriasis, the diseases incident to advanced years, and many others, this mode of treatment is essential. But in order that a stimulative invigorative should do good, it is absolutely indispensable that its spirituous basis should be unadulterated, and also, that it should be botanically medicated. The "flip of nature" imparted by a stimulant, however pure, unless it has medicinal ingredients combined with it, is transient and unsatisfactory, while the brain and nerve excitement produced by cheap spirits and mock tonics, containing deleterious liquor, is pernicious in the last degree, although it is often mistaken at the time for a beneficial result. The public should beware of such excitants, and seek invigoration where they will never be disappointed in finding it—in *Hostetter's Stomach Bitters*. Nerves, brain and stomach are endowed with unwonted health by this PEERLESS TONIC STIMULANT, in which a basis of the most pure and salubrious of spirits, is united to vegetable constituents of the highest

efficacy, in perfect chemical combination. Is it any wonder that a preparation containing such incomparable hygeian elements should impart strength to the weak, and bodily and mental relief to the sick and despondent. Let the nervous invalid, the dyspeptic, the sufferer from rheumatic pain, and the victim of malaria, take "heart of grace" as he reads this, for whatever disappointment he may have experienced from the medicines of the pharmacopœia, or those which unscrupulous quacks foist upon the public by puffery, he may rely upon obtaining the long sought relief from the Bitters.

An unbroken chain of affirmatory testimony, extending over a third of a century, proves, beyond the shadow of a doubt, that *HOSTETTER'S STOMACH BITTERS* is a specific for dyspepsia in all its various types, even when hereditary and constitutional. The record is open to all who choose to consult it, and the list of witnesses comprises hundreds of individuals of the highest standing in society. It is not an irritant. On the contrary, its effect is to calm physical irritation while it cures. Its effect upon the coats of the stomach is balsamic, not inflammatory, and it does not unduly stimulate either the heart or the brain.

ECLIPSES FOR THE YEAR 1897.

In the year 1897 there will be Two Eclipses—both of the Sun.

- I.—An Annular Eclipse of the Sun, February 1. Invisible to the Pacific States. Visible to North America south of a line drawn through Boston, Memphis and La Paz, Lower California: to South America, with the exception of Patagonia: to the eastern edge of Australia, and the South Pacific Ocean. The path of annulus extending from the northern point of New Zealand across the Pacific Ocean, and through the north-western corner of South America.
- II.—An Annular Eclipse of the Sun, July 29. Visible to North America south of the 56th parallel of latitude, to the northern half of South America, the western edge of Africa, and to portions of the Pacific and Atlantic Oceans. The path of annulus passing through Mexico, the West Indies, and Cape St. Roque, Brazil. Occurring as a partial eclipse, as follows:

Note.—The Tides for San Francisco are very irregular in height and interval. The asterisk (*) denotes the second morning tide, and the obelisk (†) the first afternoon tide. The letter (l) denotes the larger tide for the day, and the letter (s) the smaller one.

CALIFORNIA'S SUPREME REMEDY AND PREVENTIVE.

HOSTETTER'S STOMACH BITTERS.

IT is a subject of honest pride to the proprietors of *Hostetter's Stomach Bitters*, and of congratulation to the inhabitants of the Pacific States, that the great American Tonic and alterative has kept pace with the growth in population and resources of California. When the vast regions west of the Sierra Nevada was practically unknown, and the gold digger sought only with his "rocker" and "long tom" for the shining ore, the Bitters were introduced into California, and were the means of saving hundreds from the ravages of the dreadful malaria which was the prevailing scourge of the mining camps. Next to food and clothes they were the prime necessity of the digger, who willingly parted with his nuggets and his dust, for what he well knew to be the only reliable safeguard against the pestilence. Fortified with this sovereign preventive, he encountered with impunity the dangerous influences of impregnated air and unwholesome water, which before the arrival of the Bitters had been aggravated a thousand fold by poisonous "aguardiente" and other pernicious liquors thrust upon him. And it may be observed in this connection, that if Hostetter's Stomach Bitters possesses no other title to the gratitude of the inhabitants of the metal bearing

states and territories, they would amply deserve it for having so largely superseded the adulterated stimulants which have ever been the curse of mining regions, proving themselves to be a sure means of averting intermittent and remittent fever, and breaking up their most formidable paroxysms. The Bitters speedily demonstrated their value to the miner as a remedy for disorders of the stomach and bowels, nervous debility, scurvy, rheumatism, and other maladies engendered by bad food, hardship and excess. Never was there, in fact, a better opportunity given a medicine for proving its value than that afforded by this celebrated tonic and corrective in the early days of California. What has been the consequence of this crucial test it then underwent? That it is to-day the most popular preparation sold between the Missouri and the Pacific, not alone among the mining populations of that wide area, but also those engaged in agricultural, commercial and manufacturing pursuits. During the long term of its probation the inhabitants of California, Oregon and adjoining states and territories have learned to feel genuine respect for a remedy in behalf of which no claims have been advanced that could not be substantiated by the most convincing proofs, and which has

----	---	-------------------------	--	-------	------	------	-----	------	------------------

We see by the light of thousands of years,
And the knowledge of millions of men;
The lessons they learned through blood and
in tears

Are ours for the reading, and then

We sneer at their errors and follies and
dreams,

Their frail idols of mind and of stone,
And call ourselves wiser, forgetting, it seems,
That the future may laugh at our own.

never been known to disappoint the hopes of those who have relied upon it. Moreover, many of the cases in which its beneficent operation has been conclusively shown have occurred under the scrutiny of the medical profession, a body of men the most acute and skeptical among scientists, who refuse to credit hearsay, and are only to be convinced by well authenticated proofs.

Physicians who have observed the prompt relief it affords in dyspepsia, intermittent and remittent fevers, bowel complaints, biliousness, rheumatism, general debility, hysteria and hypochondria, have indorsed it as a most reliable specific for those maladies. This professional verdict, the press, always ready to accord credit where credit is due, has echoed and confirmed.

WEATHER INDICATIONS.

A red sunset is an indication of a fine day on the morrow. "When it is evening ye say it will be fair weather, for the sky is red."—Matt. xvi. 2. A yellow or gray sunset is an indication of wet weather, also one green or yellowish green. A red and lowering sky at sunrise is an indication of a wet day. "In the morning ye say, it will be foul weather to-day, for the sky is red and lowering."—Matt. xvi. 3. A gray morning is an indication of a fine day. A haze around the sun indicates rain. When this is seen a rain of five or six hours' duration may be expected. A halo around the sun, occurring after fine weather, indicates a storm. A halo around the moon is a sure indication of rain. The larger the halo the nearer the rain clouds, and the sooner the rain may be expected. Small colored circles which are frequently seen around the moon or sun are termed corona. A corona growing smaller indicates rain; growing larger fair weather. It is said that rain will follow a halo within as many days as there are stars within the circle.

THE United States gold dollar contains 25.8 troy grains. The ordinary pound, avoirdupois, contains 7,000 grains, therefore \$1,000,000 in gold coin weigh 3,833.1 pounds avoirdupois, or over a ton and a half. The standard silver dollar weighs 412.5 grains, and \$1,000,000 in the United States silver coinage will weigh 56,931 pounds, or nearly 28½ tons.

TWENTY-FOUR carat gold is all gold; 22 carat gold has 22 parts of gold, 1 of silver and 1 of copper; 18 carat gold has 18 parts of gold, and 2 each of silver and copper; 12 carat gold is half gold, and has 3½ parts of silver and 8½ of copper. Its specific gravity is about 19; pure gold is 19.

LIFE is a sheet of paper white,
Whereon each one of us may write
His word or two, and then comes night.
"Lo, time and space enough," we cry,
"To write an epic!" so we try
Our nibs upon the edge—and die.
Muse not which way the pen to hold;
Luck hates the slow and loves the bold;
Soon comes the darkness and the cold.
Greatly begin! though thou have time
But for a line, be that sublime,
Not failure, but low aim, is crime.

SYDNEY SMITH wielded the logic of wit with singular power. Curt, smart and unanswerable fell his blows. Thus, on the wants of Ireland: "What," says he, "is the object of all good government? The object of all good government is roast mutton, potatoes, a stout constable, an honest justice, a clean highway, a free chapel. What trash to be brawling in the streets about the Green Isle, and the Isle of the Ocean, and the bold anthem of 'Erin-go-bragh!' A better anthem would be Erin-go-bread-and-cheese! Erin-go-cabins that keep out the rain! Erin-go-breeches without holes in them!"

JUST SUCH ANOTHER.—A lady was one day driving her husband down a narrow lane when, on turning a sharp corner, they encountered a brewer's wagon. Neither had room to pass. The lady very tartly said, "He must go back, for I shall not; he ought to have seen us before entering the lane." "But how could he," replied the husband, "when there is this sudden turn in the lane?" "Never mind, I don't care; here I'll stay till doomsday, if necessary, before I give way to that man." The brewer's man over-hearing the colloquy, said, "All right, sir, I'll back out of it;" and then significantly added, "I've got just such another one at home."

A HORSE has 40 teeth, a mare only 36 (wanting the tusks or so-called wolf teeth), the ox and sheep tribes have only 32, want-

ing the eight incisors in the upper jaw. The pig has 44 teeth, the dog has 42 teeth, and mankind only 32.

A GOOD RECOMMENDATION.

BRIDGET.—“Sure, ma'm, Oi was at me last place tin years.”

MRS. OUTERCOOK.—“Where was the place?”

BRIDGET.—“Sure, ma'am, 'twas the house of corriction.”

From MRS. FANNY KIMBLE, Eaton, Ohio,
May 22, 1894:

When thirty years of age I was in bed for fifteen months from a very serious illness, and was attended by six of the best physicians of Hamilton, Ohio, without improvement. At last, confining myself to one of the oldest and best doctors of that place, he said to me one day, “Fanny, I don't believe in patent medicines, but get a bottle of Hostetter's Bitters for the stomach, if anything will help, it will.” I commenced taking it, and I can truthfully say from the very beginning it did its work most wonderfully for me, for in a very few weeks I was out of bed and at my work again.

RAW EGGS.—We do not believe that the nutritive value of raw eggs is properly appreciated. There is probably nothing so nutritious, so easily digested, and so rapidly absorbed as the albumen or white of a raw egg. For those not robust, whose appetite is not good, and whose digestive powers are enfeebled, an occasional raw egg, swallowed

whole, would prove most wholesome. Dr. Ely, of Rochester, has recently called attention to the great benefit he has derived in the treatment of disease by the use of raw eggs. We do not say that eggs should be taken to the exclusion of other nourishment, but we do believe they would prove beneficial in very many instances.

From DR. R. H. L. RUTHERFORD, Holly-
wood, Ark., January 27, 1894:

In connection with an active practice of my profession—medicine—I carry in stock a small and nice assortment of drugs. Your Hostetter's Stomach Bitters hold their own, and stand on the top round amid all new and old Tonics.

THERE is no bridge so difficult to cross as the bridge of a broken promise. Be chary of making rash vows; ponder well ere you say I will do this or that; but once having given your word abide by it, though the heavens fall. Perform your contracts when made at any sacrifice save that of honor.

"Go out, young man; she's not here," said a Pennsylvania preacher, last Sunday, in the

midst of his sermon, to a youth whom he saw standing hesitatingly in the doorway.

Arrest * Despondency.

MENTAL Depression, when not caused by anxiety, care or disappointment, must necessarily be produced by bodily weakness or irregularity. Diseases of the liver or stomach, costiveness and urinary complaints are very apt to originate it. That mind-cheering and body-regulating elixir, *Hostetter's Stomach Bitters*, is the best remedy for despondency arising from these causes, because it overcomes biliary sluggishness, indigestion, constriction of the bowels, and disorders of the kidneys and bladder. Temperance in eating and drinking, if depression proceeds from dyspepsia, is an important adjunct of medication in conquering it. Exercise in the open air, discontinuance of excessive mental exertion, lively company, cheerful conversation, and amusements involving some amount of bodily effort, also accelerate the restoration of the hypochondriac to health, and consequently to good spirits.

Nervous maladies also produce hypochondria. In such cases the external feelings manifest symptoms of derangement, as well as the thoughts, sensibilities, emotions and passions. There are roarings in the ears like the noise of a waterfall, or of a distant carriage. Floating specks and bright sparks are seen before the eyes, the skin twitches in various parts, and the smell and taste become perverted. The Bitters are equally efficacious in removing these symptoms, on account of their soothing action upon the nervous system, the steadiness of which they restore by strengthening it. In fact, whether this superlative tonic be employed as a Nervine or as an Invigorant, its effects are equally perceptible. The nervous or dyspeptic invalid is soon freed from gloomy imaginings and actual symptoms, the spirits resume their natural elasticity, and the thrill of renewed health pervades the entire frame.

WERE a star quenched on high,
For ages would its light
Still, wandering downward through the sky
Beam on our mortal sight.
So when a great man dies,
For years beyond our ken,
The light he leaves behind him shines,
Upon the paths of men.

DR. JOHNSON ON JUDGMENTS.—A lady once consulted Dr. Johnson on the degree of turpitude to be attached to her son's robbing an orchard. "Madam," said Johnson, "it all depends upon the weight of the boy. I remember my schoolfellow, Davy Garrick, who was always a little fellow, robbing a dozen orchards with impunity; but the very first time I climbed up an apple tree (for I was always a heavy boy) the bough broke with me, and it was called a judgment. I suppose that is why justice is represented with a pair of scales."

A HUNDRED men may make an encampment, but it takes a woman to make a home.
—Chinese Proverb.

ONE day of sickness will do more to convince a young man that his mother is his best friend than ten volumes of proverbs.

Temporary * and * Chronic * Indigestion.

INDIGESTION, whether it is temporary or chronic, is invariably remedied by *Hostetter's Stomach Bitters*. Confirmed dyspepsia being, however, an obstinate malady, cannot be eradicated in a moment. A complete cure requires time to effect it, but if used persistently and regularly, the Bitters always master the disease. The manifold and complex symptoms which attend indigestion, such as a gnawing sensation at the pit of the stomach, flatulence, bitter or acid eructations, fluttering of the heart, costiveness, high-colored urine, headache, a bilious complexion, loss of appetite, occasional dizziness, disturbed rest, etc., are all removed by the GREAT ANTI-DYSPEPTIC, which eradicates their cause. The rationale of its operation is directly opposed to that of the carminatives and cathartics, which, despite their utter incapacity to permanently relieve chronic indigestion, continue to be resorted to by the unreflecting. That the evolution of carbonic acid gas, which a mere antacid produces in the

dyspeptic stomach, can do no lasting good, is manifest without argument, while the effect of a simple purgative is exerted upon the bowels solely. But the Bitters, which strengthen but never convulse the stomach and intestines, is the very thing that those organs require; the first to enable it to digest the food completely, the latter to thoroughly, or in other words naturally, perform the office of evacuation.

The Bitters, by overcoming dyspepsia, are the means of strengthening the entire system, weakened in consequence of imperfect nutrition, since they render the blood rich, pure and abundant. Under the influence of this potent stomachic and genial tonic, the muscles acquire vigor and elasticity, the meagre frame gains flesh, the complexion is clarified and freshened, and the depression that dyspepsia produces lifted from the mind, which is still further refreshed by the healthful repose which it obtains in consequence of undisturbed digestion, and the nervous system at peace with the stomach.

The world is a vain old fellow;

You must laugh at his sallies of wit,
No matter how brutal, remonstrance is futile,
And frowns will not change him one whit.
And since you must journey together,

Down paths where all mortal feet go,
Why, life holds more savor to keep in his
favor,

For he's an unmerciful foe.

PUR not your trust in a woman, is a paraphrase to which the tragedian George C. Milne would unhesitatingly assent. He was at one time playing in a Western city, and observed in the front row a woman dissolved in tears. Highly flattered, he sent an attendant to say that he would like to see her after

the performance. When they met, Mr. Milne was graciousness itself. "Madam," he said, "I perceive that my acting moved you." "It did that," said the old woman. "You see, sir, I've got a young son myself play actin' down in Kentucky somewhere, an' it broke me all up to think that mebbe he warn't no better at it than you, sir."

THE sea was pretty rough, the ship was pretty rocky, and the sick passenger was leaning against the rail. "Be careful," cautioned an officer, "or you will lose your balance." The passenger went through two or three spasms. "Well," he replied, "if this thing keeps on there won't be much balance to lose."

From R. H. HUTCHASON. M. D., Cannelton, Ind., May 22, 1893:

I am still using and recommending your valuable Hostetter’s Stomach Bitters, and would not, or in other words, could not hardly practice without your Bitters as a tonic, in this climate where we have so much malarial fevers to contend with.

A GENTLEMAN who was traveling through one of the most insalubrious districts of India, found living there an Irishman of very contented appearance. “I don’t see how you can live in such a place,” said the traveler, “where people die so thick and fast!” “Tell me the place, sorr,” said the man, “where people never die—tell me the place, and I’ll go there myself and end me days.”

From GEORGE A. PONTIUS, Columbia City, Ind., May 16, 1894:

In our nineteen years’ experience in the drug business, Hostetter’s Stomach Bitters is the only one that has come to stay. Each year it seems to gain more ground with us.

A COMPARISON of the maximum temperature in different parts of the world shows that the Great Desert of Africa is by far the hottest. This vast plain, which extends 2,000 miles from east to west, and 1,000 miles from north to south, is said to have a temperature of 150° Fahrenheit in the hottest days of summer.

If we deny ourselves for our children, we must expect that they should also do the same for us.

NEVER wait for a thing to turn up. Go and turn it up yourself. It takes less time, and is surer to be done.

Serious * Danger * Averted.

WE should never wear out, were it not for the gradual annihilation of bodily substance which is constantly going forward within us, and which, as we grow older, becomes less resistible by the reparative forces of Nature. The debris which is created by this destructive process, makes its exit from the system through the kidneys and bladder. Torpidity of those organs, far more than their irritation, obstructs this discharging function, and is productive of the most serious peril, since it not only poisons the blood, but produces local diseases which it is next to impossible to overcome. As many persons have a constitutional tendency to dropsy and uremia, two maladies of which the disability above alluded to is surely productive, and as renal dis-

orders are very common indeed, it is certainly most important to have at hand a reliable diuretic. *Hostetter's Stomach Bitters* is an excellent invigorant and stimulant of the organs of urination, and consequently a means of protecting them against diabetes. Bright's disease, cystitis, catarrh of the bladder, and stricture. If the discharging action of the kidneys and purity of the blood is maintained—a dual result of using this admirable tonic depurent—a most imminent danger is averted. It is, moreover, highly desirable that the preventive should be resorted to promptly, when there is retention of the urine or difficult micturition, since these symptoms of a morbid tendency rapidly develop into chronic disease.

LIVE while you live, the epicure would say,
And seize the pleasures of the present day;
Live while you live, the sacred preacher cries,
And give to God each moment as it flies.
Lord, in my life let both united be,
I live in pleasure when I live to thee.

HIS OWN PRESCRIPTION.—This story is told of the late Sir Andrew Clark. At a dinner party one night he noticed that the lady sitting next to him at table passed a dish to which he helped himself plentifully. He asked if she did not like it, as it was excellent. She replied, "Oh, yes, I like it, but my physician forbids me to eat it." "Stuff and nonsense," said Sir Andrew, "it could not hurt any one. Who is your physician?" To which the lady, whom the medical magnate had forgotten, answered, with a demure twinkle in her eye, "Sir Andrew Clark."

WHAT AN INCH OF RAIN MEANS.—Few people can form a definite idea of what is involved in the expression, "An inch of rain." It may aid such to follow this curious

calculation: An acre is equal to 6,272,640 square inches; an inch deep of water on this area will be as many cubic inches of water, which, at 27 to the gallon, is 22,000 gallons. This immense quantity of water will weigh 220,000 pounds, or 100 tons. One-hundredth of an inch (0.01) alone is equal to one ton of water to the acre.

CHEMICALLY the apple is composed of vegetable fibre, albumen, sugar, gum, chlorophyl, malic acid, gallic acid, lime and water. Furthermore, the apple contains a larger percentage of phosphorus than any other fruit or vegetable. The phosphorus is admirably adapted for renewing the essential nervous matter—*lecithin*—of the brain and spinal cord. It is perhaps for this reason—though but rudely understood—that the old Scandinavian traditions represent the apple as the food of the gods, who, when they felt themselves to be growing feeble and infirm, resorted to this fruit to renew their powers of mind and body.

From S. W. KELLEMS, Riceville, Ind., September 21, 1894:

I take pleasure in recommending Hostetter's Stomach Bitters. I have prescribed it

in several cases of dyspepsia, and in every case proved to be an absolute specific. It is also a good appetizer as well, and a splendid auxiliary in modifying a sluggish circulation.

A MEDICAL journal says that in the continued use of the eyes in such work as sewing, type setting, book keeping, reading and studying, the saving point is in looking up from the work at short intervals and looking around the room. This may be practised every ten or fifteen minutes. This relieves the muscular tension, rests the eyes, and makes the blood supply much better.

From DR. W. OSBORN, Springdale, Ky., February 1, 1894:

I use your Hostetter's Stomach Bitters in my practice, and they are the best I can find to build up a weak system.

From DR. A. J. GILLESPIE, Whitney, Neb., June 5, 1894:

I often prescribe your Hostetter's Stomach Bitters as a good tonic, and keep it in stock

WHEN we don't spend our money we are economical; when other people don't spend their money they are stingy.

"A MAN'S own good breeding is the best security against other people's ill manners," says Lord Chesterfield.

First * Symptoms * of * Disease.

HERE is no fact more generally understood than that disease is far more easily subjugated in its incipency, than at a later stage of its career. Yet how many practically ignore this fact, and consequently sink into premature graves. Strangle disease at its birth, or when it arrives at maturity it may destroy you. This you cannot do if you thwart the recuperative efforts of nature by irrational treatment. Consider that all diseases, save those infectious and contagious epidemics which attack the feeble and robust with equal virulence, are traceable to bodily irregularity and weakness: Remove these two causes of disease, and you will find yourself on the high road to health, secure from the snares and ambushes which lurk in the paths divergent from that great thoroughfare. Hope not, however, that any medicine, no matter

how promptly resorted to, can protect you, unless it strikes at the very root of the evil. First and best among the preventives of the day is *Hostetter's Stomach Bitters*, a medicine which owes its supreme efficacy to the fact, that it entirely reforms disturbances of that order which Nature has ordained as indispensable to health, in the performance of the physical functions, and imparts the nervous vigor without which they become first weak, and then hopelessly chaotic. The mainspring of health is vigor. To invigorate the body means not only to lend force to its muscular power, but to endow its internal mechanism with the activity essential to healthful action. This is precisely the effect of *Hostetter's Stomach Bitters*, which, by infusing fresh energy into the digestive, biliary and excretive organs, gives a direct positive check to disease.

God give us men! A time like this demands
Strong minds, great hearts, true faith and
ready hands;

Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue
And damn his treacherous flatteries without
winking;

Tall men, sun crowned, who live above the fog
In public duty and in private thinking.
For while the rabble with their thumbworn
creeds,

Their large profession and their little deeds,
Mingle in selfish strife, lo! Freedom weeps,
Wrong rules the land, and waiting Justice
sleeps.

DR. J. G. HOLLAND.

A TIME-HONORED drink for feverishness
and colds is prepared in this way: Take a
dessertspoonful of flaxseed, with two or

three thin slices and the juice of half a lemon,
and enough loaf sugar to sweeten. Pour
upon this about a pint of boiling water,
cover close, and let it remain until just cool
enough to drink. It should be administered
to the patient after he is in bed for the night.
It will induce perspiration, and break up a
cold if taken at the beginning.

TEASING FRIEND—"What makes that new
baby at your house cry so much, Tommy?"
Tommy (indignantly)—"It don't cry very
much; and, anyway, if all your teeth was
out, and your hair off, and your legs so weak
you couldn't even stand on them, I fancy
you'd feel like crying yourself!"

BABIES require from 16 to 18 hours' sleep
out of the 24; children about 12, and young
people 8. As age increases the number of
hours required decreases, and after the age
of 60, five or six hours sound sleep suffice to
maintain health.

HERBERT SPENCER said that he made a point of giving his digestive organs as little to do as possible, and in that way he

had succeeded in attaining a ripe old age. "What is known as a good dinner," he added, "would kill me outright."

Relief * for * the * Sleepless.

ASIDE from the terribly harassing nature of Insomnia, or want of sleep, its tendencies are very dangerous. Apoplexy and insanity are not only results of inability to sleep at all, but more remotely threaten those whose rest is imperfect. No man can long possess those twin blessings "a sound mind in a sound body," whose rest is constantly broken from any cause, whether natural or artificial. Every function of the body is disturbed by want of sleep, and every organ is weakened by it. Occupations that deprive persons of their natural rest cannot be pursued with safety, nor can dissipation be indulged in at the expense of sleep without grave peril. The remedy of all others most conducive to sound repose is *Hostetter's Stomach Bitters*, which, when systematically used, invariably removes the dyspeptic or nervous causes which originate insomnia. A

wineglassful taken at bed time is far more inductive of "the balm of hurt minds, great nature's second course," than any of the narcotics or sedatives usually prescribed as remedies for sleeplessness. Wonderfully soothing to the excited brain is the action of the great tonic nervine. It allays the anxiety and depression that insomnia causes, comforts the mind, strengthens the dyspeptic stomach, and effectually compensates for the inordinate destruction of bodily tissue provoked by this dangerous inability. It possesses this decided advantage over other sedatives, that whereas they almost invariably tend to disorder the stomach and necessitates an increase in the size of the dose, this most desirable of remedies produces its soothing effect by a combined salutary action on both brain and stomach, and does not require any variation in the original dose.

Oh, many a shaft at random sent,
Finds mark the archer never meant,
And many a word at random spoken
May sooth or wound the heart that's broken.

A FRESH egg is one of the best remedies for dysentery. When beaten up lightly and swallowed it tends to soothe the intestines, and gradually lessens the inflammation of the stomach. Sick people will often swallow the yolk of an egg with a few drops of vinegar and a little pepper, in the same way they would an oyster, when they have difficulty in taking nourishment. Anæmic patients find an egg beaten up with milk very nourishing and easy to digest.

Two gentlemen in an auction room were disputing the possession of a picture by a celebrated painter, which faithfully represented an ass. Finally one of them said: "My dear sir, it is of no use, I shall not give

in. The painting once belonged to my grandfather, and I intend to have it." "Oh! in that case," replied the rival, suavely, "I will give it up. I think you are fully entitled to it if it is one of your family portraits."

BUTTERMILK alone will often remedy acidity of the stomach. The lactic acid needed in many cases is supplied by it much more than by any other drink or food. It is said to alleviate the oppression about the heart so many old people suffer from, and it should be constantly drunk by them.

IRISHMAN (to photographer)—"Can yez make me nose a little smaller an' straighter in me photo than it is on me face?" Photographer—"O yes, sir. By means of retouching I can make your nose any shape." Irishman—"That's illigant. Phat wud ye charge to retouch me rale nose?"

THE bird that to the evening sings,
Leaves music when her song is ended;
A sweetness left which takes not wings,
But with each pulse of eve is blended.

Thus life involves a double light;
Our acts and words have many brothers;
The heart that makes its own delight,
Makes also a delight for others.

AN EMIGRATION PROBLEM.

THE ABORIGINE.—"The white man has driven me to my death. I go to chant my requiem and join the Great Spirit."

THE WHITE MAN.—"Make room for me. I am the last real American. Emigration has put me in the same fix with yourself."

From O. B. HARRIMAN & SON, Hampton, Iowa, March 17, 1894:

Have been selling Hostetter's Stomach Bitters for more than a quarter of a century, and are still selling them. Others that were then selling have dropped out—disappeared from the market and from the face of the earth—only Hostetter's left.

COST AND AMOUNT OF FOOD.—According to some recent statistics on the cost of living in different countries, the following averages are correct:

	COST OF FOOD.	EATS LBS. MEAT.	EATS LBS. BREAD.
Englishman,....	\$48	109	280
Frenchman,....	47	87	540
German,.....	42	64	580
Spaniard,.....	23		480
Italian,.....	24	28	400
Russian,.....	23	51	635

THE LAWS OF HEALTH.—The true secret of health and long life lies in very simple

things: Court the fresh air day and night. "Oh, if you knew what was in the air!" Sleep and rest abundantly. Sleep is nature's benediction. "Work like a man; but don't be worked to death." Avoid passion and excitement; a moment's anger may be fatal. Associate with healthy people; health is contagious as well as disease. Don't carry the whole world on your shoulders far less the universe. Trust the Eternal. Never despair. "Lost hope is a fatal disease."

From E. McMILLON, Trimble, Tennessee, April 23, 1894;

I think your Hostetter's Stomach Bitters is the best Tonic Bitters on the market.

Birds suffer much from thirst in winter time. Snow when eaten does not quench thirst, and so a little water put outdoors in a saucer will relieve the thirst of any of the little sufferers who happen to find it.

No cosmetic has ever been invented which is such an absolute beautifier as fresh air.

A HAPPY fireside is better than a big bank account.

Complexional * Indications.

IF the Liver is inactive, the complexion is pretty sure to be bad, and for the very simple reason that the bile being diverted from its natural channel gets into the circulation, and forcing its way into the vessels of the skin, imparts to it a saffron tint, which finally communicates itself to the whites of the eyes. Besides this, bile in the blood is very apt to produce eczema, blotches, boils, sores, scurf and other eruptive manifestations. The sure way to clarify the complexion, and restore to it the glow of health, is to use *Hostetter's Stomach Bitters* until bilious irregularity is overcome, which it speedily will be through the agency of this prime regulator of the liver and invincible foe of indigestion. As the action of the liver is more or less dependent upon the activity of the stomach, boluses, powders and potions designed to relax the bowels through

the instrumentality of the gastric organ, and which by their unwholesomeness and violent action serve rather to weaken it than to obviate the difficulty, are surely a most irrational means for remedying those indications of biliousness which manifest themselves in the countenance and upon the tongue. If those persons who, when they "look bilious," dose themselves with blue pills, jalap, salts and senna, or podophyllin pellets, only knew what injury they were inflicting upon their interiors, they would never swallow such baneful rubbish again. Sir or Madam, if you perceive that your skin is sallow, or your tongue is coated, try a few doses of the Bitters, an experiment which will assuredly convince you of their power, not only to banish indigestion and biliousness, but also that unbecoming tinge and haggard aspect which mutely declare that the stomach and liver need regulating.

BEAR the burden of the present,
Let the morrow bear its own;
If the morning sky be pleasant,
Why the coming night bemoan?
Holy strivings nerve and strengthen,
Long endurance wins the crown;
When the evening shadows lengthen,
Thou shalt lay the burden down.

BISMARCK says that he owes his rugged old age to the practice of bathing regularly and freely in cold water. Gladstone ascribes his longevity to the regularity of his habits. Tennyson that his good health was due to his not having worried about the small affairs of life. Von Moltke thought his ripe old age was owing to temperance in all the affairs of life, and plenty of exercise in the open air. De Lesseps thought he owed his advanced age to like causes. Taking all these life-giving agencies together, and con-

sidering how easy they are of attainment, there does not seem to be any good and sufficient reason why we should die young.

THE PUN OF HIS LIFE.—The celebrated John Hunter is said to have made but one pun in his life, and that was when lecturing in the Windmill street School of Medicine. In demonstrating the jaw-bone, he observed that the bone was known to abound in proportion to the want of brains. Some students at the time were talking instead of attending to the lecture, upon which Hunter exclaimed, "Gentlemen, let us have more intellect and less jaw."

STATISTICS of life insurance people show that in the last 25 years the average of man's life has increased 5 per cent., or two whole years, from 41.9 to 43.9.

Malaria * and * its * Antidote.

MIASM, which is the medical name for the atmospheric poison which begets intermittent and remittent fevers, is by no means confined to marshy districts of country, although it is unquestionably most fecund in such localities. It occasionally manifests itself in an epidemic form, in populous cities supposed to be protected by sanitary regulations against any visitation of the air breathed by their inhabitants. A bad system of sewage, and accumulations of vegetable refuse in the streets, are very apt to give birth to malarious disease. But, however or wherever produced, *Hostetter's Stomach Bitters* never fail to afford efficient protection against its attacks, and the promptest and most complete relief from them. Throughout the West and South-west, where vast regions of country are periodically subjected to the visitations of chills and fever, and

other complaints of a malarious type, the Bitters are regarded as an indispensable medicinal staple, since they are known to be the best, nay, the only means of enabling the constitution to resist the insidious influences which produce febrile epidemics. In the West Indies, South America, and other tropical countries, where periodic fevers prevail, the merits of the Bitters are widely appreciated. To the emigrant and traveler they are invaluable as a safeguard against complaints caused by a change of air, water and diet, and they are a capital antidote to sea-sickness, as well as to all disorders of the stomach, liver and bowels. The herbal ingredients of this peerless remedy are such as to constitute it an alterative, tonic and blood depurent of the highest order, while its basis of pure spirits is an admirable agent for diffusing its medicinal properties through the system.

FUEL AND THE SPEED OF SHIPS.—Although the *Britannia* in 1840 needed only 570 tons of coal to carry her across the Atlantic, and the *Campania* burns 2,900 tons, yet the cargo space has grown from 224 tons to 1,720 tons, the passenger accommodation from 115 to 1,700, the indicated horse power from 710 to 30,000, the pressure from 9 pound to the square inch to 165 pound, and the coal consumption per indicated horse power has fallen from 5.1 pound to 1.5 pound, the speed rising from 8.5 knots to 22. Theoretically 1 pound of coal ought to do the work it now needs $1\frac{1}{2}$ pounds to effect. There seem to be latent here at least a couple of knots more speed, as practice draws nearer to the perfection of theory.

A DEFENDER of his country, home from the wars, was graphically describing to his aged mother the fearful loss experienced in

advancing through an open country. "Why did you not take shelter behind the trees?" she anxiously suggested. "Trees!" he scornfully replied, "why, there weren't enough trees for the officers!"

JUDGE HOAR was trying a case at New Bedford, where the witnesses all bore the name of Cash, and all appeared badly on the witness stand. As the district attorney called his fifth witness, "John Cash," the judge leaned forward and said: "I suppose you call your witnesses Cash because they are no credit to anybody."

EXERCISE gradually increases the physical powers, and gives more strength to resist sickness. It does for the body what intellectual training does for the mind—educates and strengthens it.

How * to * Enrich * the * Blood.

To enrich the blood is to invigorate the body. The question is, how can it be done most effectually? If all queries could be answered as easily, the occupation of conundrum making would be abandoned. Brace the digestive and assimilative organs, correct those functional irregularities which weaken the system with *Hostetter's Stomach Bitters*, the purest and most efficient of invigorants. No mineral tonic possesses a tithe of its efficacy. It does not merely stimulate the appetite, which is the only effect of most of the so-called invigorants, but enables the stomach to thoroughly and rapidly digest the food, and the assimilative organs to convert it into pure bone and muscle making blood. There is not an organ of the body that is not reinforced and regulated, in a greater or less degree by this prime herbal tonic, since it permanently overcomes

the grand exciting cause of disease, viz., weakness. Those who use the Bitters find that they render the body vigorous and elastic, keep the mind clear and energetic, and dissipate every symptom of nervousness and indigestion. The eulogies bestowed upon this incomparable cordial by the press, the public, and the medical profession, are no more than it deserves, since it is not only a positive specific for many disorders, but is a means of establishing and maintaining a high standard of health in all who use it. It repairs the constitution shattered by disease, hastens convalescence, and is an unfailing source of comfort to the aged and infirm. Furthermore, it prevents too rapid decay, when the constitution is merely deficient in strength, without being actually diseased, and by increasing the powers of endurance, enables those who resort to it to encounter fatigue and exposure.

A SINGER sang a song of cheer,
And the great world listened and smiled;
For he sang of the love of a Father dear,
And the trust of a little child;
And souls that before had forgotten to pray
Looked up and went singing along the way.

The specific gravity of any body is the proportion which the weight of a certain bulk of that body bears to the same bulk of another body, which is taken as a standard. The standard for substances, solid and liquid, is distilled water at the temperature of 62° Fahrenheit, barometer 30 inches; and the weight of a cubic inch of this standard is given as 252.456 Troy grains; hence a cubic foot of it weighs 997.128 avoirdupois ounces, or 62.32 avoirdupois pounds. For aeriform bodies the standard is atmospheric air, a cubic inch of which at temperature of 32° Fahrenheit weighs .32628, and at 60° Fah-

renheit .30935 grains Troy. The specific gravity of solids is best measured by the hydrostatic balance.

FOR A COLD IN THE HEAD AND CATARRH.
—Take five cents worth of camphor gum, add an equal amount of borax, ten drops of oil of peppermint, and pulverize together. This is inhaled as a snuff. It is agreeable, healing, cleansing, and will clear the head and throat wonderfully.

A FAIR and buxom widow who has buried three husbands, recently went with a gentleman who, in his younger days, had paid her marked attention, to inspect the graves of her dear departed. After contemplating them in mournful silence, she murmured to her companion, "Ah, James, you might have been in that row now if you had had a little more courage.

The * Body * Purified * and * Fortified.

HOSTETTER'S STOMACH BITTERS not only strengthen the body, but purify it by banishing from the circulatory system those foreign elements which, under conditions unfavorable to health, are developed in inordinate quantities. Among these are the lithic, lactic and uric acids, universally acknowledged by scientists to be the exciting causes of rheumatism, gout and gravel. Cream of tartar, colchicum and various other drugs are used to expurgate these acids from the circulation, and are called depurents, but they are notoriously ineffective. Is it reasonable to suppose that such medicine can prove permanently beneficial in cases where the vital current is contaminated, when they do not, and never have been supposed to exert any regulating influence upon digestion or assimilation, two functions whose uninterrupted and vigorous discharge can alone restore purity to the blood? A true appreciation of the medicinal wants of the body, dictates a far more philosophic

mode of procedure than the administration of palliatives, of which the subsequent effect is to derange still further the sources of vitality. It is impossible to reconcile the already disordered stomach with nauseous and unwholesome medicaments. They should, therefore, be abandoned, and *Hostetter's Stomach Bitters*, a general restorative of purity and vigor, substituted in their place. From that secret laboratory—the Stomach—will there then be furnished to every part of the body, a pure, rich current, abounding in the corpuscles of health, and very different from the watery and contaminated fluid which before the use of this sovereign fertilizer and cleanser of the blood, moved sluggishly through the veins. Then every organ of the body will perform the duty assigned to it by nature, without faltering, and the consequence will be that abnormal developments will be stifled in their birth, and the seeds of disease eradicated from the system.

THE highest velocity ever given to a cannon ball is estimated at 1,626 feet per second, being equal to a mile in 3.2 seconds. The velocity of the earth at the equator, due to its rotation on its axis, is 1,000 miles per hour, or a mile in 3.6 seconds. Therefore, if a cannon ball were fired due west, and could maintain its initial velocity, it would beat the sun in his apparent journey round the earth.

Of the 6,200 kinds of flowers which grow in Europe, only 620, or 10 per cent., are odoriferous. The commonest flowers are the white ones, of which there are 1,194 kinds. Less than one-fifth of these are fragrant. Of the 951 kinds of yellow flowers, 77 are odoriferous; of the 853 red kinds, 84; of the

594 blue kinds, 31; of the 308 violet-blue kinds, 13. Of 240 kinds with combined colors, 28 are fragrant.

THE largest place of amusement ever constructed is the Coliseum at Rome. Its external circumference is 1,728 feet, its long diameter 615 feet, its short 510, its height 150. It had four stories, and could seat 87,000 spectators, while 60,000 more could find standing room.

THE celebrated John Randolph met a personal enemy in the street one day, who refused to give him half the sidewalk, saying that he never turned out for a rascal. "I do," said Randolph, stepping aside and politely raising his hat, "pass on."

THE RESULT OF LITERATURE.

POLICEMAN.—"So, yez young rascal, I've got yez at last, have I? Where are two young divils, your confederates?"

NICKEL JIMMY (who has read deeply).—"When did a Pequod ever betray his red-skinned brother? Do you take me for a Mingo? My scalp may be found a hangin' to the belt o' the pale face, an' my tongue be splitted by his knife, but a oath binds me to my tribe, and I will not betray them. If the great Manitou wishes it I kin die at sunrise, but my oath I will keep; it is register-r-red above!"

From Dr. W. S. SPEEDY, Schnellville, Indiana, May 21, 1894:

Hostetter's Stomach Bitters need no comment, as they speak for themselves. Have sold them for a number of years, and find them to be one of our best remedies. I shall continue to use and prescribe them.

ONE CAUSE OF SORE THROAT.—If any part of the body is heated more than the rest by overdressing it, or for any other cause, an undue flow of blood sets in towards that part, often resulting in chronic inflammation. I once knew of a fatal case of kidney disease developed by working at a desk with the back near a heated stove. Similar effects are produced by having one part of the body more warmly clothed than the rest. Many

a sore throat arises from the tippet worn by children, harm resulting both from overheating the throat when on, and from suddenly cooling when it is taken off.

From C. H. GROTE, Mauston, Wisconsin, March 9, 1894:

I commenced selling your Hostetter's Stomach Bitters twenty years ago, and I have found them always the same good tonic Bitters.

WHATEVER your sex or position life is a battle, in which you are to show your pluck, and woe be to the coward. Despair and postponement are cowardice and defeat. Men are born to succeed, and not to fail.

Obstruction * of * the * Bowels.

IRREGULARITY in the habit of body, caused by obstruction of the bowels, is extremely subversive of the general health. In consequence of it the bile becomes injected into the blood, causing the skin to assume a saffron hue, and sores and eruptions to break out upon it; it contaminates the urine, inflames the kidneys, and interferes with digestion and the secretive functions of the liver, and produces still more serious consequences. It will, therefore, be seen how desirable it is that a healthful action of the bowels should be reinstated as speedily as possible. The best and most agreeable laxative is *Hostetter's Stomach Bitters*, not only because it achieves the object in view thoroughly, and without any of those internal earthquakes which drastic cathartics produce, but also, by virtue of its invigorating influence upon

the stomach, the mild but salutary stimulation it affords to the liver, and its regulating and vitalizing effect upon the whole system. The use of violent purgatives is earnestly to be deprecated, as such medicines weaken and even inflame the bowels, reducing them, after the primal effect has passed off, to a worse condition than they were in before. Hostetter's Stomach Bitters relieves by strengthening the bowels, and by promoting the secretion of healthy bile, and its impulsion into the proper channel, tend to perpetuate a regular habit of body. As a necessary consequence of this result, indigestion, irritation of the skin and whites of the eyes, headache, and other disagreeable *indicia* of costiveness are promptly dismissed by this preëminently popular corrective and tonic.

FAMILIES.—The average size of families in the various countries of Europe is as follows:

France,.....	3.03	Sweden,.....	4.12
Denmark,.....	3.61	Holland,.....	4.22
Hungary,.....	3.70	Scotland,.....	4.46
Switzerland,.....	3.91	Italy,.....	4.56
Austria & Belgium	4.05	Spain,.....	4.65
England,.....	4.08	Russia,.....	4.83
Germany,.....	4.10	Ireland,.....	5.20

A CURE for lumbago is to take a piece of oilskin cloth, such as we use to cover tables, but of soft pliant kind, sufficiently large to cover the loins; place it over the flannel shirt, and bandage yourself with a flannel bandage; profuse perspiration will ensue on the loins, and you are quickly rid of this wearisome complaint.

THE observatory method of determining time is very simple in principle. The observer turns to his catalogue of stars, and chooses one for his observation, the catalogue giving him the time (to the hundredth

of a second) at which that star will be seen on his meridian; he then turns to the telescope, and at the instant the star crosses the meridian records the same indicated by his clock. The catalogue gives the true time of passage, and unless the clock gives the same it is in error.

"By Jove!" said a country squire, who had got the worst in an argument with Sydney Smith, "if I had a son who was a donkey, I'd make a parson of him straight away." "Possibly," returned the wit, "but your father was evidently of a different mind."

THE seven Bibles of the world are the Koran of the Mohammedans, the Tri Pitikes of the Buddhists, the Five Kings of the Chinese, the three Vedas of the Hindus, the Zendavesta of the Persians, the Eddas of the Scandinavians, and the Scriptures of the Christians.

Advice * to * the * Weak.

GOOD, properly cooked food, fresh air, moderate exercise, abstinence from exciting pleasures, regular hours and sound sleep, are all important items of a hygienic plan of life, adapted to the requirements of the weakly constitution, and their value cannot be too strongly urged upon the feeble. But while they powerfully contribute to invigoration, they are, after all, subsidiary to the chief requisite of those who are weak, and that is a tonic, wholesome, potent and of vegetable composition. The mineral and alkaloid drugs prescribed and prepared as invigorants have all, without exception, this drawback, that their operation is to a great extent impaired in consequence of their indigestible nature. It cannot be denied that they stimulate the appetite, but they unfit the stomach for its gratification. There is but one stomachic which may, in the true sense of the term, be called a strengthener of the system, and that is *Hostetter's Stomach Bitters*, a preparation which has

been before the public for a third of a century, but against which no one can justly bring the accusation that it contains anything incompatible with digestion, or ever fails to afford that tonic relief which the debilitated and sickly so much require. If any one who reads this has a friend who is troubled with a want of general or local physical power, or is debilitated by disease, the best advice he or she can give is, to resort without delay to that purest, most thorough and prompt of invigorants. Besides imparting strength, it eradicates such prolific causes of weakness as dyspepsia, want of sleep, irregularity in the habit of body, nervous excitement, poverty of the blood, kidney and bladder complaints, and uterine disorders. It is an excellent resuscitant in cases of fainting and extreme exhaustion, and it is the most popular preventive of malaria, as well as the complaints complicated with, or attributable to that malady, that has ever been brought forward in this country.

VERY few people seem to realize the great value of cream as food, and its superiority over butter, by permitting the gastric juices to mix with it in the most perfect manner, and in this way assisting digestion. For invalids it serves as nutriment in the most easily available form.

A DECOCTION of cinnamon is recommended as a drink so be taken freely in localities where there is typhoid fever or cholera, for cinnamon has the power to destroy all infectious microbes. Even its scent kills them, while it is perfectly harmless to human beings.

JONES was very much henpecked, but patience has its limits, and at last he broke

loose one day. His wife was greatly astonished, and said, "Are you mad?" To which he responded, "No; but I am possessed of a devil."

THE most rational modes of keeping physical decay or deterioration at bay, and thus retarding the approach of old age, are avoiding all rich foods, and using much fruit, especially apples.

A LONDONER stood on the stern of a steamer as she swung out of Liverpool, and holding a shilling aloft, cried out, "If there's a man, woman or child in this blessed town I've nottipped, come forward now, for this is your last and only chance. 'Pon my word, 'tis worse than London."

How * to * Gain * Flesh.

BESIDES the immense number of private recipes for remedying leanness, exploited by fat people for the benefit of their lean friends, there are in print various—and preposterous—plans for attaining that end. But the problem has only one genuine solution. To overcome meagreness, the conversion of food into blood, which is the producer of flesh, must be freed from interruption, and all dyspeptic tendencies completely subdued. This desirable consummation is arrived at through the agency of *Hostetter's Stomach Bitters*, which is a supreme invigorant of the mucous lining of the stomach, a stimulant and improver of the digestive fluid, and an accelerant of the nutritive processes. By relieving the blood of its impurities, they also tend to increase its nourishing properties, and augment the deposition of muscle and fat. In kidney and genital disorders, leanness is sometimes so extreme as to suggest marasmus.

Hostetter's Stomach Bitters counteract the drain upon the system by their invigorative effects, and where the malady is susceptible of cure by diuretic and tonic treatment, generally remove it. Complete assimilation being restored by the Bitters, and all the animal fluids essential to health and staminal vigor strengthened and purified by their use, there is a natural and irresistible tendency to an increase of bodily substance, which no mere dietetic could ever produce. The lean should never be governed in their choice of food by the dicta of the theorizers upon diet, who are continually rushing into print, but adopt and adhere to those articles of food which they find suit them best. The pursuance of this course, the observance of the laws of health, and the regular use of the Bitters, will do more to fill out their "hollow places" than any of the absurd regimens recommended by the would-be abolitionists of leanness.

It is not the greatest singer,
Who tries the loftiest themes,
He is the true joy bringer
Who tells his simplest dreams.
He is the greatest poet
Who will renounce all art,
And take his heart and show it
To any other heart;
Who writes no learned riddle,
But sings his simplest rune,
Takes his heartstrings for a fiddle,
And plays his easiest tune.

THIS is a very simple recipe for a hairwash, and extremely cleansing to the scalp, as well as good for promoting the growth of the hair. Place one ounce each, of powdered borax and camphor into a pint bottle, and fill it up gradually with boiling water. This wash should be well rubbed into the roots of the hair twice a week with a sponge.

TRAVELERS in the arctic regions say the physical effects of cold there are about as follows: 15° above, unpleasantly warm; zero, mild; 10° below, bracing; 20° below, sharp, but not severely cold; 30° below, very cold; 40° below, intensely cold; 50° below, a struggle for life.

WHEN the Queen was wed to the Prince Consort, it is related that the Archbishop of Canterbury asked her if she would prefer the word "obey" to be omitted from the service. Her majesty replied, somewhat sharply, "I wish to be married as a woman, not as a Queen."

BANKS (from his berth, feebly)—"I say, steward, do you think it's all up with me?" Steward (cheerfully)—"Heverythink for the present, sir, but your happepette will be a comin' bye-an'-bye."

"MAN, KNOW THYSELF!"

"Your bump of veneration, sir, is fearfully and grandly developed!"

"Och, murther! an isn't meself that's thankful to Paddy Rooney for that bump, when he rapped me on the head wid a club!"

From E. W. BARTLESON, Pleasanton, Kan.,
February 24, 1894:

Your Hostetter's Stomach Bitters is the standard and leading preparation of its kind in this market, and has been on my shelves continuously for the past twenty-three years, and I am convinced it has no competitor.

CLEAN DAMP AND DIRTY DAMP.—Some one made the pertinent remark about beds that people are afraid of clean damp, but not of dirty damp. The meaning is that they insist upon having everything from the laundry thoroughly aired before it goes upon the bed, but that after it is in use on the bed, they fail to understand why the dampness and foul exhalations should be dissipated every morning before the bed is made.

LOSS OF HAIR.—In 100 cases of loss of hair reported by Dr. G. T. Jackson, the following summary is arrived at: 1. Men are far more prone to baldness than women, the proportion being 65 to 35. 2. Neither the

married nor unmarried state exercises any influence in the production of baldness. 3. It is probable that active brain work and nervous mental strain predispose to baldness.

THE nature of truth may be changed by the garb it wears; softened by the admonition of friendship, or soured into the severity of reproof. Yet this severity may be useful to some tempers; it somewhat resembles a file, disagreeable in its operation, but hard metals may be the brighter for it.

From W. R. HARRIS, M. D., Waterloo, S. C.,
February 28, 1894:

I am a physician and druggist at this place, and I can use your Hostetter's Stomach Bitters in my practice very often.

WHEN a man reaches the top of a stairway and attempts to take one step higher, the sensation is as perplexing as if he had attempted to kick a dog that wasn't there.

Peril * in * Frequent * Change * of * Water.

VARIETIES of water are more numerous than those of wine.

Scarcely any two springs, rivers or lakes yield, under chemical analysis, precisely the same results. This difference in the properties of water is a faithful source of sickness to travelers; for changes of water, as a general rule, affect the health more sensibly than changes of food. The river water of the West and South, and the still more disagreeable fluid found in the holes and pools of "the plains," create a terrible disturbance in the stomachs and bowels of strangers; while, on the other hand, the people of those regions sometimes suffer from drinking the purer element of the Middle and Eastern States.

The surest way to avoid the unpleasant and often dangerous consequences of a change of water, is to fortify the stomach, and regulate and tone the

bowels, by having recourse to that most salubrious of all stomachics and alteratives, *Hostetter's Stomach Bitters*. Indeed, the travelers should never drink fully of any water to which he is unaccustomed, without first mixing with it a small quantity of the Bitters. By following this advice the diarrhœal and dysenteric affections that so frequently afflict tourists and voyagers may generally be escaped. In a country like ours, where so considerable a portion of the population is on the wing, it is a fact worth knowing and that it is a fact is established beyond all cavil by the testimony of thousands. Common prudence therefore should induce travelers to provide themselves with a supply of this valuable protective and antidote before leaving home; and should the stock prove insufficient, there will be no difficulty in replenishing it on any highway of travel in North and South America.

NERVOUS people should eat fat food. Every irritable and exhausted nerve should, if possible, be coated with fat. Fat is to a tender nerve what an air cushion is to a tired invalid; it eases jolts wonderfully.

A HABIT of courtesy is like a delicate wrapping which prevents one personally from rubbing and chafing against another; and it thus prevents much of the friction and irritation of life.

HUSBAND—"Who the deuce has been pouring ink into this wash-basin?" Wife—"Hush, not so loud! Your friend from Pittsburgh has just been washing his hands."

ARTIST'S FRIEND (pointing to sketch)—"I say, Harry, where did you get that?" Har-

ry—"Why, I got that out of my head." Friend—"Well, it's a lucky thing for your head that you got it out."

IN the midst of a battle the general saw a man running from a very close situation. "What are you running for?" demanded the disgusted general, in a stern voice. "Sure, general," said the fugitive, "I'm running because I can't fly."

THE interchange of birthday presents in many cases means the giving of something you can't afford in return for something you don't want.

Look up and not down; look forward and not back; look out and not in; and lend a hand.

THE WIDE SPREAD POPULARITY OF

Hostetter's • Stomach • Bitters

AT HOME AND ABROAD.

THE history of Proprietary Remedies within the last third of a century furnishes no parallel to the increase in popularity of this mighty Botanic Restorative, at home and abroad. Other medicines, coëval with it in date of introduction to the public, have perished, and their very names have been forgotten, but this

CONQUEROR AND PREVENTIVE OF DISEASE

has held on its career of prosperity, the circle of its beneficent operation ever widening, and its sales ever on the increase. It is to-day the chief invigorant and corrective in the United States, and is regarded with the utmost favor in the British North American possessions, South and Central America, Mexico, the West Indies and Australia. Its rapidly increasing repute in tropical countries is mainly attributable to the fact that it is the best known remedy for

Disorders of the Stomach, Kidneys, Liver and Bowels,

of which hot climates are peculiarly fruitful, and because it is such a potential safeguard against the malarial epidemics that are the scourge of such regions, in which it is also largely used to combat the enervating influence of long continued heat.

Of course, the manufacture and dissemination of such a widely popular medicine involves an immense outlay, and the employment of a small army of work people and agents in the various and extensive ramifications of the business connected with it. The amount yearly disbursed for advertising it in home and foreign newspapers, magazines, &c., and in publishing annually, in nine different languages, an edition of 12,000,000 copies of this Almanac, makes in the aggregate a vast expenditure.

But the cost, great as it is, of preparing and sending forth the Great Specific, *Hostetter's Stomach Bitters*, on its healing and preventive mission, and of explaining its merits to the world, is amply repaid by the proceeds of its sales, which increase so rapidly and steadily, that it is impossible to foresee the extent to which they may eventually be augmented.
